

NOW Available

BC Gerolamy is now shipping Magneti Marelli throttle body conversion kits for our DF50 throttle body.

Basic kit includes fuel block, fuel line adapter fittings & hardware to convert DF50 for use on Magneti Marelli equipped bikes.

We also can supply injectors to support a wide range of power outputs.

Currently bikes are running with ICT engine control units & we are developing combinations using alternate ECU's. Give us a call if you have any questions regarding your application or to place an order

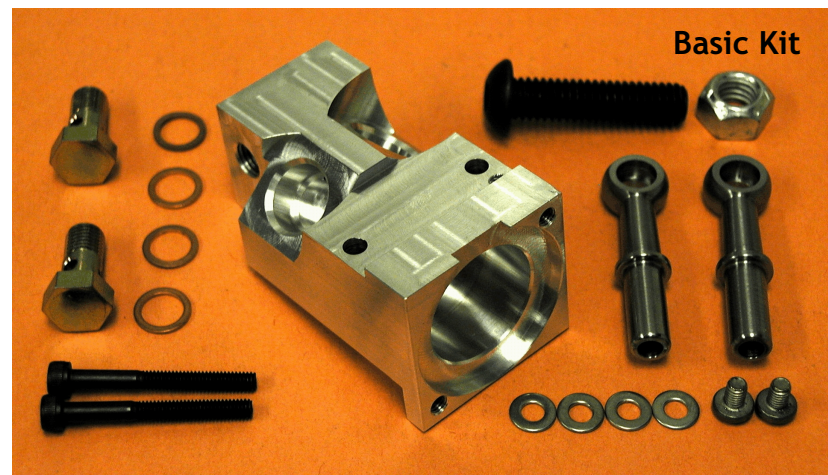

Basic Kit installed on DF50
injectors & regulator not included in kit

Parts required to complete conversion
2- HD# 61340-02A Fuel Lines
1- HD# 27628-01 IAC unit
1- HD#27408-01 Pressure regulator
