KMS Sportgroup Inc. and Lyndall Racing Brakes release the ultimate Police Motorcycle Brake Rotor!

Dateline: Jan. 23/07, Abbotsford, BC:

Police Officers are some of the most demanding riders in the Canadian Market.

Their Harley Davidson® Police bikes are often run on back to back shifts, seeing 18 to 24 hour service cycles. Ultimately, in all kinds of weather and road conditions, these dedicated professionals continually test the limits of man and machine.

KMS Sportgroup Inc. and Lyndall Racing Brakes are now delivering an exciting two part brake upgrade designed specifically for the motorcycle line officers of Canada.

Written up in every mainstream V-twin magazine in North America, the amazing **KMS/LRB full floating stainless steel brake rotor**, has now been released as a Police or Cruiser upgrade in a special industrial finish.

Unlike any other brake rotor in North America, this outstanding rotor package available in both front and rear applications, is offered to the Police Departments through their authorized Harley Davidson ® retailer or service facility with a “ **Lifetime Service Guarantee** ”.

Cont'd Page 2

There is no fine print here, just 3 conditions for this guarantee:

- 1) The rotors must be installed with KMS/LRB Z-Pad Brake pads.
- 2) The rotor must never be allowed to run out to metal on metal.
- 3) The installation must be carried out by a trained motorcycle technician.

The second part of the Brake Upgrade package is the addition of the amazing **KMS /LRB Z - brake pad** to the departments service cycle.

The Z-pad is made of an outstanding friction material, delivering quiet, trouble free, dustless performance day in and day out, under all weather conditions. This pad is proven to deliver unprecedented wear and longevity to the working motorcycle. In **US Police testing and actual department riding**, it is not uncommon to see 15,000 to 18,000 mile service cycles on rear brake pads, and 20,000 mile service cycles on the front, with virtually no brake rotor wear due to the proprietary friction materials design of Carbon & Kevlar.

The **Z-pad** is the cheapest and quickest brake upgrade available in Canada for any line bike seeing service in Drill teams, or every day road work.
