**FOR IMMEDIATE RELEASE**  
9 AM PST, Sept15th, 2006

**KMS SPORTGROUP INC. & THE LYNDALL RACING BRAKE COMPANY**

**PREPARE FOR THE 2007 RACING SEASON. !**

KMS Sportgroup Inc and the Lyndall Racing Brake Company are thrilled to announce the production of their **NEW Apex Metal Matrix Composite Brake Rotors** for racing applications.

Lyndall Brakes, Voted the Best New Product of the 2003 year, by the Motorcycle Industry at Cincinnati and KMS Sportgroup Inc. have set their collective sights on becoming the premier V-Twin performance racing brake pad and brake rotor supplier serving the Canadian Racing Community.

Just announced is the completion of the first **New LRB Apex Composite Front Racing Brake Rotor** with delivery in late fall of 2006. This rotor will mount to virtually all current 4 bolt race hub configurations. Initial production will focus on the popular .25 " backspaced 11.5 brake rotor, with a new 10 inch rotor to arrive shortly after. The Ultimate Apex Rear racing Brake Rotor will be ready by December 2006.

Lyndall Racing and KMS Sportgroup Inc. have already completed testing of the next generation of super LRB pads for this race rotor application and production has begun on these new brake pads in the most popular 4 & 6 piston caliper applications.

In addition, LRB and KMS Sportgroup Inc. is now taking pre-production orders on their new 13 inch Apex Composite brake rotor for street applications for late fall delivery.

This proprietary designed, performance brake rotor, is **Full Floating**, and weighs in at a stunning **1.5 pounds to 2 pounds** depending on the size and carrier used.

**Apex Metal Matrix Composite Brake Rotors** offer the ultimate in stopping power, and deliver a serious reduction in unsprung weight for both the performance street and racing rider.

If you are building the ultimate V-twin or are a serious race competitor, you should find out more about these amazing new brake rotors.

**If it isn't a Lyndall Racing Brake Pad or an Apex Metal Matrix Composite Brake Rotor, then you aren't using the best in Canada. Ask for them by name, Lyndall Performance Braking Components from KMS Sportgroup Inc..**

**When only the best will do!**
